## ePulse™ REMOTE MONITORING SOFTWARE

This remote monitoring & configuration software has the functionality of providing the capability to manage settings remotely and monitor your high-density powered mobile system's performance and operations with assurance.

For maximum reliability and peace of mind, ePulse™ proactively identifies any potential issues with your system, provides quick diagnostics of the system to maximize your uptime, sends automatic email notifications of system errors. You could even decide to monitor and configure your own Montel powered mobile system 24 hours a day, every day of the year. To increase productivity & efficiency, ePulse™ allows to collect aisle entry data for any preset period of time from your Montel powered mobile system. Once this data is analyzed for each aisle, ePulse™ permits to reconfigure your powered mobile system to your preferred settings and parameters including:

- Priority Aisle
- Auto-Closing/Security Park
- Auto-Spacing/Ventilation Park
- Auto-Cycling
- Programmable Speeds (start-up/cruising/braking)
- Sequential Move, Block Move

For additional security, with the collected & analyzed aisle entry data from your powered mobile system, ePulse™ allows to reconfigure the security settings of your system at anytime. Whether it be adjusting the programmable speeds, or remotely configuring your system to close all aisles and lock at a specific time after business hours, or open and unlock before business hours, ePulse™ offers security with peace of mind.

## PROGRAMMABLE AISLE AUTOMATED FEATURES

Users can increase their efficiency by configuring a specific priority aisle(s). While accessing an infrequently used aisle, HI-BAY MOBILE shelving automatically repositions the system to your designed predetermined aisle(s).

## REMOTE CONTROL

Operators can operate the mobile system remotely with a commercial or industrial rugged remote control mini tablet.

### MONTEL REVOLUTIONIZES MOBILE STORAGE WITH AISLE LED GUARD™ FOR HI-BAY MOBILE

Montel's powered mobile systems supplied with the advanced optional safety **Aisle LED GUARD™** passive safety adds a new dimension by continuously detecting the whole floor surface footprint of an aisle.

#### The world of high-density storage will never be the same

**Aisle LED GUARD™** represents a major watershed moment in employee safety and shrinkage prevention for industrial storage used in day-to-day operations.

With nearly a century of mobile storage experience under its belt, Montel developed **Aisle LED GUARD™** to keep industries everywhere perpetually productive, cost-effective and employee-friendly. So, how does Montel's patented **Aisle LED GUARD™** work and why do those features matter to modern businesses?

#### AISLE LED GUARD™ IN A NUTSHELL

Mobile shelving reduces storage footprints thanks to its collapsible architecture. However, in industries like manufacturing and logistics where processes move at lightning speed, thoughtlessly closing a mobile storage unit could pose a risk to both goods and workers.

#### SEEMS PRETTY STRAIGHTFORWARD, RIGHT? LET'S DIG A BIT DEEPER INTO AISLE LED GUARD™ TO FULLY UNDERSTAND HOW MONTEL DESIGNED THE PERFECT SAFETY PRECAUTION:

##### COMPLETELY PASSIVE

**Aisle LED GUARD™** is 100% passive. Users do not have to remember to locate and activate any safety devices when interacting with the mobile shelving system. Even with fully loaded racking, **Aisle LED GUARD™** will protect users and objects left in the aisle without human intervention.

##### FULL COVERAGE

Where users stand in an open aisle will not impact the effectiveness of **Aisle LED GUARD™**. When Montel customers invest in powered mobile shelving supported by **Aisle LED GUARD™**, they're putting their money into complete aisle coverage for consummate protection. No matter where a user are located in the aisle, no matter where in the aisle a product falls, no matter if a pallet is left in the aisle, the units will not close without complete clearance. With full coverage from LED sensors, **Aisle LED GUARD™** protects users and objects every step of the way.

##### FOOLPROOF DESIGN

**Aisle LED GUARD™** used in Montel products cannot be deactivated, overwritten or bypassed. No sequence of button mashing or reconfiguration will shut it down. **Aisle LED GUARD™** places mobile shelving installations in a constant state of vigilance.

##### IMPROVE PRODUCTIVITY

Operators can easily reset HI-BAY MOBILE remotely with the industrial rugged Wi-Fi remote control. Users won't have to step out of their forklifts to reset the system.
