FOR A  
LASTING  
LEGACY

# CORRIDOR LOCKERS

## Single-Point Latch

This single-point latch corridor locker is a strong and durable metal locker. In addition to being quiet and maintenance free, this all-welded locker does not have any moving parts, which ensures an economic and outstanding performance for generations of students and staff.

The Nova line 50 Series comes in single, double and multiple tiers, ideal for schools and changing rooms. Also available in banks of 1, 2 or 3 columns and built recessed or wall-mounted. Many size options are offered and we also provide a quick-ship program for stock items.

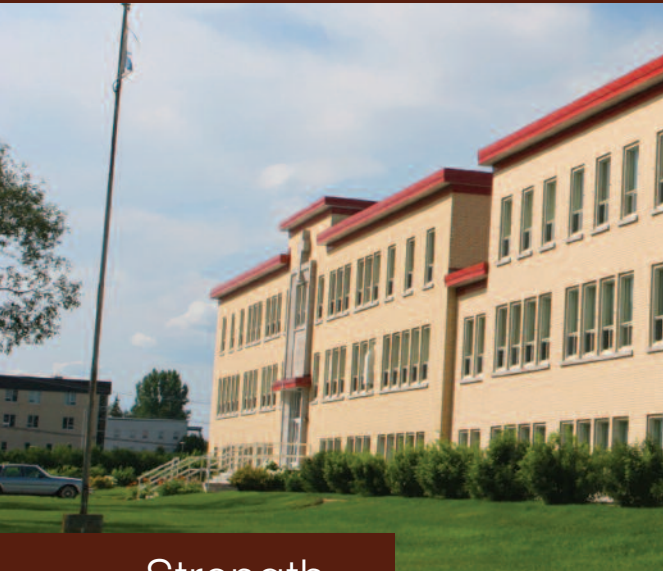

A wide selection  
of sizes and options  
are available to meet  
your needs.

## 3-Point Latch

If you are looking for a maintenance-free, three-point latching corridor locker, the Liberty line 53 Series of all-welded lockers is the answer. Strong and secure, this metal locker can be installed as a single application or in a widespread locker area. It is perfect for school corridors, changing area and staff rooms. This locker delivers a very reliable, durable and cost-efficient solution for your institution's specific demands.

The Liberty line 53 Series is available in a recessed or wall-mounted configuration. You can choose a single or multiple tier set up, ranging from 1 to 3 columns.

Strength

Performance

Reliability

## Heavy Duty (1 & 3-Point Latch)

The heavy duty single-point latch locker is designed to withstand intense use and is resistant to rough conditions.

This locker is standard built from thicker, 16-gauge steel with many strong features such as continuous piano hinges and a full-height continuous door strike. Our heavy duty locker will stand the test of time and performance, even in the toughest environment.

Built to deliver peace of mind, durability and security, this line is offered in many sizes and choices of tier configurations. Just select your options...

# ATHLETIC LOCKERS

## 1 & 3-Point Latch

This athletic locker is made of welded metal and offers many great features. Solid and resistant, it is virtually maintenance free and features a grid for easy air circulation.

They can be installed in alcove, stand-alone configuration, or simply wall mounted. These options offer flexibility for the various needs of schools, gyms, or fire stations.

Heavy duty gaging also available.

## Wardrobe Lockers

This large athletic wardrobe metal locker offers many storage and usage possibilities. Made of superior calibre welded steel, it is resistant to the elements and ensures a long-lasting, practical and secure usage. It is equipped with a wooden bench on top of a storage compartment that automatically locks when the locker door is closed. The gridded doors offer a great ventilation system. This multifunctional locker can adapt to all your needs, in whatever environment or usage.

## Team lockers

Specially designed for the comfort and needs of sports team members, this team locker has a remarkable functionality. Made of a large welded steel structure and a lockable upper compartment to keep the user's personal belongings safe. A solid wood bench incorporated in the locker doubles as a lid for a ventilated and lockable storage compartment. This locker meets all standards of strength, resistance and security, and is an essential element for a stadium, arena or gymnasium locker room.

## Basket Lockers

This solid basket locker will meet the particular needs of any gymnasium by providing practical and efficient solutions to your stacking needs. Its perforated baskets provide good air circulation, therefore preventing any unpleasant odours. Lockable, they offer a secured service to the user. A model that is resistant and easy maintenance.

## Law Enforcement

Among other things, we specialize in the manufacturing of police lockers. Made of welded steel, they are resistant, functional and multipurpose.

Our standard police lockers have two doors, but are also available in single door, according to required width.

This type of locker is only custom made in order to better meet the very specific needs and requirements of the police force. The layout possibilities are unlimited and specially-adapted accessories are here to serve you.

## Tactical Lockers

This resistant model, made of superior steel calibre, offers many storage options.

Equipped with a drawer (which automatically locks when locker door is closed), a bench, a hook for body armour, as well as a triangular clothing separator and a lockable compartment, it meets all special requirements in a functional and efficient manner.

Ventilation is optimized thanks to interior and exterior perforations. These openings also allow for easy set up of electrical devices.

# SPECIALTY AND CUSTOM

## Mining & Industry

This giant locker with double doors was created for workers who need to store soiled clothing and accessories. Its elements offer assured comfort, such as the wooden bench located below. This locker is ventilated, functional and easy to clean, while still offering security and strength.

Therefore, the welded-metal locker is a great custom solution that meets the specific needs of workers such as miners and industrial workers.

We can customize your project to create an infinite number of possibilities.

CHOOSE THE OPTION  
THAT BEST SUITS  
YOUR NEEDS

## SPECIAL ORDERS

We can design and create custom lockers and layouts that will meet your requirements and specifications. We can meet your needs, even the most specific ones. We guarantee quality service and products, which offer security, flexibility and functionality. A great number of variable options are available for you.

## Handles and Locks

Keeping in mind your requirements and flexibility, we would like to propose the best possible solutions. Different types of handles and locks were therefore designed to equip our units. Available models include combination locks, key locks, padlocks or Digilocks, which allow you to choose the option that is most suitable for your needs.

## Benches

Our benches, ideal for any locker room, offer a variety of design options. Made of durable materials, they are intended to withstand all kinds of conditions.
